

Finishing Options

Sealing any outdoor structure with a super durable 4-5 mil thick powder coat adds long term protection—as well as branding. Brasco offers standard, specialty and custom powder coat colors with the optional anti-graffiti powder coat layer. All processes are done in-house to ensure total quality control.

We offer proprietary color matching, mix-&-match color accenting and painted artwork overlays. If you do not see the powder coat color of preference below, please select one from the standard RAL color chart.

In addition to powder coating, Brasco offers two anodized aluminum finish options below. Anodizing may not be possible with your product's design if abundant welding is required.

Shade series transit shelter powder coated in Mineral Bronze.

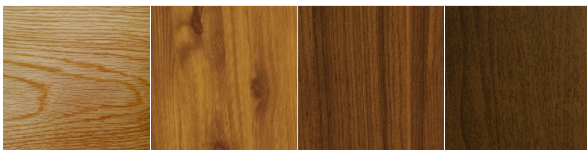

STANDARD POWDERCOAT FINISHES

Smooth, glossy finish unless otherwise specified below.

								
Traffic White RAL 9016	Oyster White RAL 1013	Brasco Clear Clear Anodized Alternative	White Aluminum RAL 9006	Signal Grey RAL 7004	Grey Aluminum RAL 9007	Slate Grey RAL 7015	Mineral Bronze PCT25111	Terra Brown RAL 8028
