WOODGRAIN POWDER COAT

Long Lasting Wood Finish Without the Deterioration

Brasco International, Inc. offers woodgrain powder coat finishes as an alternative to standard aluminum powder coating. Woodgrain powder coating offers the aesthetic of real wood without the ongoing maintenance and deterioration associated with it. Our powder coat finishes offer a slightly textured surface to further replicate an authentic finish.

Aluminum is the ideal material for outdoor shelters and site furnishings, as it will never rust over time. Mix and match our standard powder coating with woodgrain powder coating accents like bench slats or roof rafters.

Standard woodgrain tones include Light Bamboo, Oak, Walnut, Cherry, Douglas Fir and Knotty Pine., and additional finishes are available upon request.

STANDARD FINISHES

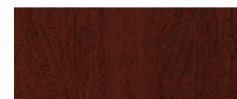

Light Bamboo
DS 745-2902/01

Oak
